

Police Activity in Hidden Glen Subdivision, September 2004-February 2005

NOTES

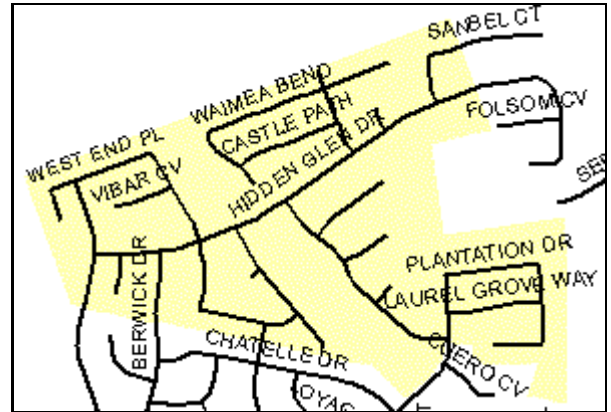

This map shows the streets that are included in the analysis. The data source for this analysis is the Police Department's Computer-Aided Dispatch (CAD) database, meaning these data are drawn from information police dispatchers enter into the computer as calls occur. The primary limitation of these data is that they may not reflect the actual nature of a call or its true final disposition. Thus, some care should be exercised in interpreting the results presented here.

Traffic and animal-related calls are screened from the analysis.

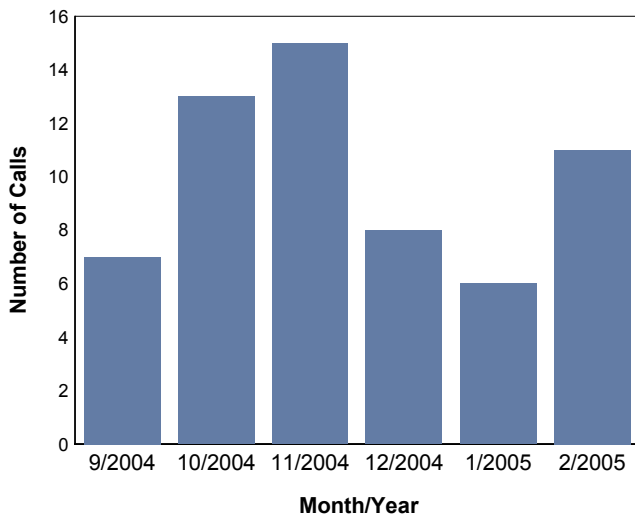

Any questions regarding these results or the report's preparation can be directed to:
